Tips for Creating Better Worship Images

Include atmosphere words

warm lighting

contemplative mood

sacred atmosphere

soft natural light

Add composition instructions

Including this phrase helps create images that work for worship slides:

sermon slide composition with text space

This ensures there is room for sermon titles, scripture, or lyrics.

Consider modern settings

Modern imagery can help congregations connect scripture with their daily lives.

For example:

modern depiction of the Good Samaritan in an urban setting, diverse people showing compassion and care, contemporary Christian illustration, sermon slide composition with text space

These kinds of visuals help bring biblical stories into present-day context.
